Description
The ASCO 3-Way Solenoid Pilot Valve is used to vent DeZURIK spring-return actuators upon electrical power failure. When the solenoid is energized, the actuator functions in a normal manner through a controller or positioner.

Electrical Characteristics
This pilot valve is available in several different voltages. See the data plate attached to the pilot valve for the electrical characteristics of that unit.

Connections
Attach the air supply line to port #2 on the solenoid valve. Attach the line to the actuator casing/cylinder to port #1. The valve vents through port #3.
